PHILANTHROPIO DISCOVERY.

PEFOT AT THE CARLTON HOUSE, 92 Leconard-sa, corner of Broadway, where can be procured the memoir that I published in June last entitled "The Science of Medicine reduced to its simplest form," containing the Important philanthropic discovery of M Louis Deschamps, by means of which every one can be nis own physician and apothecary; diffusion of the knowledge of the proporties of a piant which will be of easential service to humanity, on the danger arising from the use of fire arms, resulting from the precaution generally used to prevent accidents. In order to complete my philanthropic enterprise, I have employed all the means which my imagination has suggested to anable the whole population of the United States to receive its benefits. I have addressed my memoir to all the editors of newspapers throughout the United States to receive its benefits. I have addressed my memoir to all the editors of newspapers throughout the United, in order to smalle every one to receive almost gratis the recipe and the prescription, which it contains, and to make the necessary application at once without the aid of any intermediary. I believe that by addressing mysself to the Governors of the respective States and the Monicipal Gouncila of the principal cities, to the members of Congress and the officers of the Executive Department of the General Government, all select and intelligent persons, I was taking the beat means to popularize my discovery through the medium of the public prints. I have dispatched a copy of my memoir to every editor whose address I could obtain. I have neglected nothing to facilities the universal knowledge of my discovery. I have used every precaution to render the preparation of my panaces easy to be understood, so that every one interested in the subject might make it without difficulty. The prescription for its use, in all varieties of disease, can be readily followed.

which are not found here, and are not very abundant even in Europe.

Those who do not wish to take the trouble to prepare my remedy, can find it put up in bottles at my depot. The urgent request of many of the citizens of New-York and the deficiency of the necessary materials, are the reasons that induce me to anticipate the period, which I had fixed on for establishing a depot, which I did not antend to do until after full trials of my remedy in some part (no matter where) of the United States. I cannot forbear urging on the public the expediency of this trial at an early day. Society is interested in the question, especially with reference to the progress of the Gobiera. I am ready to guarantee with all possess the most happy results. They de-clitorial corps to assign to my philianthropic article the most honorable position in their journals which it may be in their power to give.
